

ATTENTION ALL AP BIOLOGY II STUDENTS!!!!!!

In an effort to get a start on the new year and thoroughly prepare for the AP exams in the spring, there are a few things that I would like you to do by the time school begins.

We will not have time to cover every single chapter in the Campbell book, so please read Chapter 54: Ecosystems and Chapter 51: Behavior. Chapter 54 is related to material learned in pre-IB Bio I and Chapter 51 is material to be covered for the Options portion of the IB exam. In addition, complete the objectives #1-30 for Chapter 51 (see second page) and be prepared to turn in your work the first week of school. **Make sure you do your own work—no collaboration.** I also recommend that you take some time to review the material in the soft cover study guide for those two chapters. There will also be a test on these two chapters towards the end of the first week of school.

Other chapters that you may want to review on your own as they will not be covered completely in class include Chapter 4 involving carbon chemistry and most of Unit 6: Plants—Form and Function. Some of this material will be reviewed before the AP exams but not discussed in detail during class sessions. Of course you have until May to investigate this material on your own.

Thank you in advance for your efforts. I am looking forward to a great year and much success in **2011-12**.

Enjoy your last few days of summer and I will see you soon!

Mrs. Frank-Aldrich
